

Bosean BH4S + Gas Sampling Pump Gas Detector 4 in 1

1. = GAS DETECTOR =

The product support four kinds of gas detection: flammable gas (EX), oxygen (O₂), hydrogen sulfide (H₂S), carbon monoxide (CO)

1. Industrial-grade sensor, high precision, view the historical alarm data, and has a data storage function
2. Four alarm mode (sound, light, vibration, display)
3. High-strength ABS material, waterproof, dustproof, explosion-proof
4. Data connected to the computer, can store 500 sets of alarm records.
5. Simple operation, resolution 320 * 240 HD interface display, hinese and English bilingual settings

Four kinds of alarm methods

Using high-decibel beep alarm, vibration tips, four lights flashing, the interface data color change tips, real-time curve analysis, simple and clear, high and low dual alarm value can be set.

- √ O2
- √ EX
- √ H2S
- √ CO
- √ Time
- √ Temperature

Product information:

Material: ABS

Display: 2.4" LCD

Detection method: Diffusion type

Unit switch: ppm / mg / m³

Alarm mode: sound, light, vibration, display

Power supply: rechargeable 3.7V lithium battery

Explosion-proof mark: Exib IIB T3 Gb

Protection class: ip65

Record storage: 500 groups of alarm records

Product Size: 145 * 69 * 28mm

2. = GAS SAMPLING PUMP =

Features:

With digital / large screen / high-power self-priming pump / stainless steel probe / original micro-motor / fast warm-up / power-on self-test function

Advantages: gas detector pump can be used in explosion-proof or toxic gas leakage pipes, warehouses, lights confined space

Draw flow: 500ML / min

Warm-up time: <20S

Standard configuration: probe, hose, charger

Working voltage: DC3.7v1800mAH

Ambient temperature: -20-50 ° C

Note: After use, please quickly clean the air for 5 minutes to replace the residual gas in the pump

Package Weight: 1700g
